Licentaury

What is Licentaury?

- **License Server:** protects your software applications
- **TCP/IP based** (network connection between clients and server)
- **Server:** NT Service, runs on Windows NT/2000/XP/2003/Vista, 32 or 64 bit
- **Client** runs on any Windows operating system

Licentaury

One computer in a network hosts the **Licentaury** License Server. The clients have access to the server over a TCP/IP network. The clients request permission to run licensed software.

Licentaury

Client

Application | Licentaury Client Library

The software applications on the client use a Licentaury Client Library (LCL) that provides the interface between client and server.
